**Description:** Integrio collaborates with Federal clients to effectively select, acquire, implement and support IT solutions that sustain and support their organizational missions, at the best value. We place the satisfaction of our customers as our highest priority; this is reflected in our enthusiasm for introducing innovative technologies and industry best-practice methods to solve their problems.

The Video Systems Engineer II is a self-starter with strong IP Video engineering skills who is responsible for designing and implementing complex Video-enabled solutions for our customers worldwide. Working with technologies such as IPTV, ISR, Multicast IP, Digital Signage, Virtualization and Video Cloud portals, the Video Systems Engineer II provides engineering support to customers, vendor partners and fellow Integrio team members.

### Essential Functions:

- Demonstrates expert knowledge of IP Video technologies and product knowledge of one or more of our vendor partner product lines: Haivision, VITEC, VBrick, Polycom, ATX
- Performs research and testing of these technologies within both legacy and green-field environments
- Works closely with Integrio Sales, Project Management and Engineering staffs to ensure customer objectives are met
- Authors technical response documents and customer presentations as needed
- Performs the solution design, creates bills of materials and writes scopes of work
- Provides on-site installation and troubleshooting support of IP and IP Video Technologies
- Identifies new and emerging video technologies; makes recommendations to customers/management for implementation
- Serves as Team Lead and mentor for junior engineers/technicians

### Knowledge and skills:

- Ability to resolve problems encountered/involved with integrating new technologies into existing systems
- Excellent written/verbal communication skills
- Excellent organizational and time management skills

- Ability to set goals and work independently
- Ability to work under time pressure and deadlines
- Proficient in MS suite of products including but not limited to Word, Excel, PowerPoint, Visio, etc.
- Proficient in the English language

**Education and work experience:**

- Must have 6+ years of pre/post sales IP and IPVideo Engineering experience
- A deep understanding of video encoding and compression technologies including H.264/265, MPEG-4, HLS
- Experience with various encoding/decoding/transcoding solutions and CDN architectures
- Knowledge of IP routing and switching technologies as they relate to a Video infrastructure
- Experience with virtualization technologies including VMware, Hyper V, etc.
- Certifications in one or more of the following: VCNE/CCNA/CCNA-Video/CCNP/Polycom/Tandberg/Extron

**Driving Classification:** Must have a valid DMV driver's license

**EEO Statement:** Integrio is an Equal Opportunity Employer/Affirmative Action Employer (M/F/D/V). It is the policy of Integrio to ensure equal employment opportunity in accordance with Executive Order 11246, as amended and all applicable federal regulations and guidelines. Employment discrimination against employees and applicants due to race, color, religion, sex (including sexual harassment), national origin, disability, age (40 years old or more), or veteran status is illegal. Integrio managers and employees will comply with state and federal equal employment laws, rules, regulations and guidelines experience.

Integrio utilizes E-Verify.
