

# U.S. PTO IDIQ Contract

IT Products and Product-based Services  
Contract # DOC50PAPT1500048

## Solutions from Integrio Technologies

Our experienced IT professionals help clients meet evolving business needs by optimizing IT resources, application performance, and business processes. Our services span many emerging and hybrid enterprise technologies, and we offer wireless access, network performance, and cybersecurity products and services that enable a secure, wireless network, and improve overall network performance and visibility.

We plan, design, procure, test, implement, migrate and deploy cost-effective, reliable IT infrastructure that maximizes customer investments. Our team provides maintenance, technology refresh, warranty management, and on-site engineering deployment services.

## Secure Wireless Solutions

Integrio is proud to partner with Aruba Networks to offer a commercial solution for classified wireless and remote access that utilizes a strong, fast set of encryption protocols and methods that enable commercial mobile devices to be used in government agency networks that handle controlled unclassified, confidential and classified information.

## Secure, Flexible WLAN Solutions

In conjunction with our partner Airtight Networks, Integrio offers intelligent edge, secure, and flexible WLAN solutions, providing enterprises with continuous and comprehensive protection against current and emerging wireless threats. Powered by patented wireless intrusion detection and prevention techniques, Airtight provides 24/7 visibility into and complete control over wireless activity in the enterprise airspace.

## Cybersecurity

With experienced partners Red Hat and Raytheon, Integrio offers leading cybersecurity products and services that enable customers to gain complete understanding and control of their cyber environments.

Red Hat is at the forefront of open source software development for enterprise IT, with a broad portfolio of products and services and a community-powered approach that provides reliable and high-performing cloud, virtualization, storage, Linux, and middleware technologies.

Raytheon's cybersecurity solutions deliver end-to-end visibility that allows businesses and governments to find, contain and control cyber threats, offering control of cyber environments and bridging the gap between defense-grade and enterprise cybersecurity.

## Application and Network Performance Monitoring

In partnership with Riverbed, a leader in network and application performance monitoring, Integrio offers end-to-end application visibility, optimization, and control in hybrid IT environments. Enterprise-wide visibility solutions, covering data centers, offices, and mobile users offer complete application visibility and optimization, including application intelligence and network visibility, real-time quality of service monitoring, and application acceleration and optimization.
