

# Network and Application Performance Monitoring

Rapid ROI through network and application visibility

As a systems integrator, you offer your customers large-scale solutions to multi-layered technology challenges, offering a one-stop shop for complex technical challenges that require the selection, integration and deployment of a comprehensive suite of complementary technologies.

Integrio's Professional Services team offers network and application performance monitoring solutions that improve overall network performance and visibility from Riverbed®—a leader in network and application performance monitoring. With a proven track record of more than 30 years of professional service experience with designing, configuring and implementing full-service network solutions, Integrio is the preferred partner of choice for Riverbed technology installations and service.

By partnering with Integrio for Riverbed installations and services, you can offer your customers the best-of-breed technology that provides rapid ROI through increased application acceleration, IT consolidation, and network and application visibility. These benefits allow your team to build upon and expand their capabilities for new and existing customers. Services built on Riverbed technology range from network assessments, health checks, and installation and configuration to ongoing management of customers' IT environments.

## Integrio Technologies and Riverbed: A Winning Team

Integrio Technologies plans, designs, procures, tests, implements, migrates and deploys cost-effective, reliable IT infrastructure that maximizes customer investments. Our team is also equipped to provide maintenance, technology refresh, warranty management, and on-site engineering deployment services.

In partnership with Riverbed, Integrio offers end-to-end application visibility, optimization, and control in hybrid IT environments. Enterprise-wide visibility solutions, covering data centers, offices, and mobile users offer complete application visibility and optimization, including application intelligence and network visibility, real-time quality of service monitoring, and application acceleration and optimization.

## About Integrio Technologies Professional Services

Our experienced IT professionals help clients meet evolving business needs by optimizing IT resources, application performance, and business processes. Integrio services span many emerging and hybrid enterprise technologies, offering a comprehensive suite of wireless access, network performance, and cybersecurity products and services from leading manufacturers that enable a secure, wireless network, and improve overall network performance and visibility.

### About Riverbed

Riverbed, at more than \$1 billion in annual revenue, is the leader in application performance infrastructure, delivering the most complete platform for the hybrid enterprise to ensure applications perform as expected, data is always available when needed, and performance issues can be

proactively detected and resolved before impacting business performance. Riverbed enables hybrid enterprises to transform application performance into a competitive advantage by maximizing employee productivity and leveraging IT to create new forms of operational agility.

Riverbed's 27,000+ customers include 97% of the Fortune 100 and 98% of the Forbes Global 100.

Integrio Technologies, an SBA-designated small business headquartered in Herndon, Va., is an IT integration and engineering company that offers reliable, cost-effective, secure solutions for organizations seeking to develop new capabilities and optimize legacy systems. Our company collaborates with its customers, partners and employees to provide outstanding cutting-edge solutions for network performance, secure wireless infrastructure, software application lifecycle support, and physical cyber security that support the missions of federal, state and local government agencies.
