

SEWP Contract Overview

IT Hardware, Software, Audio-visual Equipment, Health IT, and Related Services

What is SEWP?

Solutions for Enterprise-Wide Procurement (SEWP) is a multi-award Government-Wide Acquisition Contract (GWAC) vehicle focused on IT products and product-based services. SEWP contracts streamline the process of providing federal agencies with state-of-the-art tablets, desktops and servers; IT peripherals; network equipment; storage systems; security tools; software products; cloud-based services; video conferencing systems, and other IT and audio-visual products. Product-based services such as installation, training, maintenance and warranty are also available through SEWP. All federal agencies and their contractors can place orders through this GWAC.

SEWP offers low prices and easy and fast ordering procedures using pre-competed contracts. Through SEWP, agencies can find an exact fit for their needs at the best overall value by searching the Web and choosing the right solutions offered directly by leading hardware and software manufacturers and experienced government integrators.

Over the past decade, earlier iterations of the SEWP IT product contract have been a very popular for several reasons, including:

- Low fee (.39%)
- Excellent customer service
- Very quick contract additions
- Breadth of product offering
- Ease of purchase

About the Contract

The contract (NNG15SC88B) is a small business set-aside with a five-year base period of performance from May 1, 2015 to April 30, 2020, and one five-year option to extend the period of performance through April 30, 2025. The contract is open to all federal agencies and their contractors, and may be used to procure up to \$20 billion of information technology products and product-based services.

Integrio Products Available on SEWP

Integrio sells and services the entire scope of SEWP products, including information technology hardware, software, audio-visual equipment, health information technology, and related services. Our recent expansion into secure wireless and network and application performance management products and services strengthens and broadens our networking capability offerings. Integrio has the knowledge and understanding gained from conducting business under previous SEWP contracts, and applies that experience to provide customers the technology they need at the right price via this popular contract.

Integrio Technologies, an SBA-designated small business headquartered in Herndon, Va., is an IT integration and engineering company that offers reliable, cost-effective, secure solutions for organizations seeking to develop new capabilities and optimize legacy systems. Our company collaborates with its customers, partners and employees to provide outstanding cutting-edge solutions for network performance, secure wireless infrastructure, software application lifecycle support, and physical cyber security that support the missions of federal, state and local government agencies.
