

Corporate Overview

Secure, Optimized IT Solutions

Since its inception, Integrio has helped customers meet their strategic missions by providing secure, optimized IT solutions that allow them to perform more efficiently and effectively.

Integrio's integration and engineering services are reliable, cost-effective solutions for companies seeking to acquire and develop new capabilities and optimize legacy systems. We collaborate with customers, partners and employees to provide the most effective solutions in network engineering services, application lifecycle services, and acquisition services.

Integrity + Integration

Our name reflects what we stand for—integrity—and what we do—IT integration and services. It is evident in all we do, whether for our customers who rely on us to optimize operations, our partners who count on us to put their technology into the hands of the people that need it, or our employees who look to us to provide an engaging, collaborative, and enjoyable work environment.

Beyond Technology

Information technology is only as strong as the capabilities it provides. At Integrio, our team of experts thinks beyond the technology and crafts a solution that meets the specific needs of our customers, offering the expertise and services to transform the technology into a true end-to-end solution.

Whether the need is network performance management, cyber security, integration and imaging, secure wireless, application lifecycle, and physical security solutions, Integrio knows how to identify and implement technology to create solutions that support the missions of federal, state and local government agencies.

Network Engineering Services

Integrio's experienced IT professionals help you meet your evolving business needs by optimizing IT resources, application performance, and business processes. Our services span many emerging and hybrid enterprise technologies, and we offer a comprehensive suite of network performance, secure wireless access and cybersecurity products and services from leading manufacturers that improve overall network performance and business operations.

Application Lifecycle Services

Whether you are performing unit testing, quality assurance testing, performance testing, or reliability testing, Integrio has the solutions to help you meet the challenges of today's complex testing environment.

Acquisition Services

Representing some of the world's most trusted brands, we help clients choose the right technology for business operations, continuity, data protection, software development, collaboration and IT security needs.
